Course description. Prerequisites: BIOL 1107 and BIOL 1108. Study of vegetative organization and reproductive cycles of bryophytes, pteridophytes and seed plants, which incorporates phylogenetic and ecological relationships. [3-3-4]

Contact hours: 150 mins lecture & 170 mins lab per week.

Credit hours: 4 sem hrs credit.

Course objectives. The student should gain an understanding of the vegetative organization, reproductive cycles, life history, and ecology of representatives of the various plant phyla, and the evolutionary origins of the plant kingdom, and the evolutionary trends, homologous variation, and phylogeny within Kingdom Plantae.

Graduate credit. Students taking the course for graduate credit (i.e., BIOL 6100), will be required to prepare and present two lectures during the regularly scheduled lecture period. Lecture topics are subject to approval of the instructor. Please be advised that this must be coordinated with your instructor well in advance.

Course Requirements and Policies

Use of BlazeVIEW as a course supplement.

BlazeVIEW will be used to make a variety of course resources and materials available, to administer certain assignments and assessments, and to post announcements and grades. Students should log onto BlazeVIEW daily in order to check for course announcements and to take course assessments. Also, the Mail tool in BlazeVIEW provides a convenient means for students to contact one another and their instructor and is the preferred means of communicating about matters relating to the course.
